

HW01-4 Submit Partial Solutions

The purpose of this assignment is to explain how the grading system can add a file that is not included in your submissions. This file is needed to build the executable. This additional file makes it possible to give you partial credits even when your submitted solution is incomplete.

This program needs four files:

1. main.c
2. add.c
3. sub.c
4. header.h

However, your submission will include only three files (without sub.c); sub.c will be provided by the grading program. If you include sub.c, it will be ignored.
