

HW01-2 Submit Multiple Files

This program needs 3 files:

1. main.c
2. add.c
3. header.h

In HW01-1, your solution contains only one file. Any non-trivial work is made of multiple components. A non-trivial C program would also contain multiple files. In this assignment, your solution should have exactly three files. Their names must be main.c, header.h, and add.c.

To build the executable, please type

```
gcc -std=c99 -g -Wall -Wshadow -pedantic -Wvla -Werror main.c add.c -o hw01-2
```

Please notice that header.c is not included in the command.

Create a zip file and submit it to Gradescope

```
zip hw01-2.zip main.c add.c header.h
```
